Dr. Suzuki has had a graduation system in Japan for many years. The purpose is to continue to raise standards for students and teachers, to provide an incentive to polish and review literature, and to provide a means of recognition for students who have achieved certain goals. In order to graduate from each specified level, a student should be working at the specified current level of study, and at his/her teacher's recommendation, must submit a cassette tape or CD recording of the corresponding pieces in the following list. It is possible to graduate from more than one level at one time. Students who have not participated in graduation before, who are qualified to enter at an upper level, may send a recording of the appropriate level and all prior levels. *The only time a student needs to record all pieces in book 1 is the first time they participate in graduation. Graduation levels II and above require only one piece to be recorded for each level.*
